|--|--------|------------|--------|--------------|-------------------|----|----|----|----|----|
| M1-INTRO: Introduction to Artificial Intelligence and Machine Learning | | | | | | | | | | |
| Welcome meeting (onsite/online) | | | | | | | | | | |
| <p>Welcome meeting: basic course info The aim of the activity is to present the basic information about the course, its content, activities, requirements and methods of assessment to all participants. The activity is going to be done on-site for participants who can make it to Žilina and online for the rest.</p> | 30 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei |
| <p>Welcome meeting: discussion The aim of the activity is for everybody involved to get acquainted, to discuss what their background is, to communicate their expectations, etc. The activity is going to be done on-site for participants who can make it to Žilina and online for the rest.</p> | 30 min | Keskustelu | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei |
| Kokonaisyksikön työmäärä | 1h | | | | | | | | | |

| Main Content | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|-------------------|----|----|----------|----|----|--------------|----------|
| Lecture content Content: - Motivational introduction; - What is AI: the 4 approaches; - Explicit / implicit approaches; - Machine learning and its types; - Supervised learning (demonstration using k-nearest neighbours); - Unsupervised learning (demonstration using k-means); - Reinforcement learning; - Local and global generalization; - Search methods (demonstration using naïve search for Sudoku); | 120 min | Hankinta | Hybrid | Synkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - KNN, an illustration; - KNN on the Iris dataset; - Preprocessing and scikit-learn pipelines; - KNN for regression; | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |
| Quiz activities Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material. | 30 min | Arviointi | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Opettaja | Ei | Ei | | |

| | | | | | | | | | | |
|---|---------|------------|-------------------|--------------|-------------------|----|-------|----|----|----|
| Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams. | 150 min | Tutkimus | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | Ei |
| Team project: selecting topics, forming teams The students select a topic for their team project and form teams. | 120 min | Keskustelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Kyllä | Ei | Ei | Ei |
| Kokonaisyksikön työmäärä | 10h | | | | | | | | | |
| M2-DATA-ANALYSIS: The Data Analysis Process | | | | | | | | | | |
| Main Content | | | | | | | | | | |
| Lecture content Content: - Data analysis: the steps; - Preprocessing, missing data imputation; - Exploratory data analysis (EDA); - Visualization; - Dimensionality reduction (PCA, t-SNE, UMAP); | 120 min | Hankinta | Hybrid | Synkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei |

| | | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|-------------------|----|----|----|----|----|--------------|----------|--|
| M3-SIMPLE-ML: Introduction to Simple Machine Learning Methods | | | | | | | | | | | | | |
| Main Content - Copy | | | | | | | | | | | | | |
| Lecture content Content: - KNN: a distance-based, lazy method; - Naïve Bayes classifier: considers each feature independently; - Decision Trees: considers combinations of features; - Ensembles: what they are, how they work, why they work; | 120 min | Hankinta | Hybrid | Synkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - Decision tree based classification and regression; - The impact of pruning hyperparameters: an illustration; - Ensembles: - Homogeneous; - Heterogeneous; - A naïve Bayes model for text classification; - ... | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja | |

| | | | | | | | | | | |
|---|---------|-----------|-------------------|--------------|-------------------|----|----|----------|----|----|
| Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams. | 330 min | Tutkimus | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | Ei |
| Quiz activities Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material. | 30 min | Arviointi | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Opettaja | Ei | Ei |
| Kokonaisyksikön työmäärä | 11h | | | | | | | | | |
| M4-CLUST: Cluster Analysis | | | | | | | | | | |
| Main Content | | | | | | | | | | |
| Lecture content Content: - Clustering methods; - k-means; - hierarchical; - DBSCAN; - Distance measures; - Application examples; | 120 min | Hankinta | Hybrid | Synkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei |

| | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|-------------------|----|----|----------|----|----|--------------|----------|
| Lecture content Content: - Convex optimization tasks, methods, principles; | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - Illustrational notebooks regarding optimization tasks and methods; - Applicational examples; - ... | 120 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |
| Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams. | 390 min | Tutkimus | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Quiz activities Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material. | 30 min | Arviointi | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Opettaja | Ei | Ei | | |
| Kokonaisyksikön työmäärä | 11h | | | | | | | | | | | |

| | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|-------------------|----|----|----|----|----|--------------|----------|
| M6-OPTI-LEARN: Optimization- based Machine Learning | | | | | | | | | | | | |
| Main Content | | | | | | | | | | | | |
| Lecture content Content: - A recap on the "acting rationally" AI paradigm; - What optimization is; - How it is used in machine learning, minimizing a loss function, etc.; - Simple optimization-based approaches: - Linear regression; - Polynomial regression; - Gradient descent; - Logistic regression; - Batch, incremental and mini-batch learning; | 120 min | Hankinta | Hybrid | Synkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - Gradient descent on a regular and an elongated surface; - Linear, polynomial and logistic regression; - Optimization-based regression in Python using SciPy; - ... | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |

| | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|----------------------|----|----|----|----|----|--------------|----------|
| Lecture content Content: - Evaluating model performance; - Verifying the ability to generalize: - Split validation; - Stratification; - The validation set and model selection; - Cross-validation; - Performance measures: - For classification: - Why accuracy is not enough; - ROC analysis etc.; - Micro/macro averaging for multi-class problems; - For regression; - Bias vs. variance trade-off; - Regularization methods; | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - Examples on model evaluation; - Performance measures for classification: - Examples with class imbalance - accuracy is not enough; - Performance measures for regression; - Diagnosing underfitting and overfitting; - Regularization methods in classical (shallow) machine learning | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |

| | | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|----------------------|----|----|----------|----|----|--------------|----------|--|
| Lecture content Content: - Why interpretability can be crucial; - Prediction vs. inference; - Model-agnostic interpretability methods - LIME, - Partial dependence plots; - Feature importance (permutation, etc.); | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja lÄsnÄ | Ei | Ei | Ei | Ei | Ei | | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - Interpretability for tabular ML: sample notebooks; - ... | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei lÄsnÄ | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja | |
| Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams. | 330 min | Tutkimus | Verkkotyöskentely | Asynkroninen | Opettaja ei lÄsnÄ | Ei | Ei | Ei | Ei | Ei | | | |
| Quiz activities Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material. | 30 min | Arviointi | Verkkotyöskentely | Asynkroninen | Opettaja ei lÄsnÄ | Ei | Ei | Opettaja | Ei | Ei | | | |
| Kokonaisyksikön työmäärä | 11h | | | | | | | | | | | | |

| | | | | | | | | | | |
|---|---------|----------|--------|--------------|-------------------|----|----|----|----|----|
| M9-AUTODIFF-ANN: Introduction to Neural Networks and Automatic Differentiation | | | | | | | | | | |
| Main Content | | | | | | | | | | |
| Lecture content Content: – Artificial neural networks can be trained using gradient descent; – Artificial neuron, activation functions; – What the artificial neuron does + linear separability, ... – Multiple layers of neurons and universal approximation; – Feed-forward/recurrent, layered/non-layered architectures; – Neural networks for classification and regression; – How to compute the gradients: autodiff; – Motivation: autodiff vs. symbolic and numeric differentiation; – Autodiff: the principle + graphical illustrations; – Backprop through common operations (graphically): – Defining new operations, incl. the caching of intermediate results; – Autodiff: a numeric example; | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei |

| | | | | | | | | | | | | |
|--|---------|-------------|-------------------|--------------|-------------------|----|----|----|----|----|--------------|----------|
| M10-DEEP-LEARN: Deep Learning | | | | | | | | | | | | |
| Main Content | | | | | | | | | | | | |
| Lecture content Content: - Motivational examples; - Why use deep neural nets: the intuition; - Why depth helps; - Neural nets can learn to preprocess; - Visualization of a deep embedding; - The challenges to deep learning in the past + modern deep learning; - Deep learning architectures; - Convolution; - Evolution of different components: ResNet, etc. - Regularization in deep learning: early stopping, dropout, BatchNorm, ... - Popular tricks: - Augmentation; - Transfer learning; - Label smoothing; - ... | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - A model pretrained on ImageNet; - Training a CNN on MNIST; - Transfer learning; - Regularization in deep learning; - Illustration of popular building blocks, tricks, etc. - ... | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |

| | | | | | | | | | | |
|---|---------|-----------|-------------------|--------------|-------------------|----|----|----------|----|----|
| Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams. | 330 min | Tutkimus | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | Ei |
| Quiz activities Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material. | 30 min | Arviointi | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Opettaja | Ei | Ei |
| Kokonaisyksikön työmäärä | 11h | | | | | | | | | |
| M11-DEEP-LEARN-ADVANCED: Advanced Approaches in Deep Learning | | | | | | | | | | |
| Main Content | | | | | | | | | | |
| Lecture content Content: - Unsupervised deep learning; - Autoencoders; - GAN, StyleGAN; - ... - Object detection; - Segmentation; - ... | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei |

| | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|----------------------|----|----|----------|----|----|--------------|----------|
| Lecture content Content: - Methods, principles, approaches for interpretability in deep neural networks, e.g.: - Saliency; - Pre-images; - Adversarial examples; - Neural artistic style; - ... | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja lÄsnÄ | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - Adversarial examples; - Visual interpretation; - Generating pre-images; - Neural Art; - ... | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei lÄsnÄ | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |
| Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams. | 330 min | Tutkimus | Verkkotyöskentely | Asynkroninen | Opettaja ei lÄsnÄ | Ei | Ei | Ei | Ei | Ei | | |
| Quiz activities Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material. | 30 min | Arviointi | Verkkotyöskentely | Asynkroninen | Opettaja ei lÄsnÄ | Ei | Ei | Opettaja | Ei | Ei | | |
| Kokonaisyksikön työmäärä | 11h | | | | | | | | | | | |

| | | | | | | | | | | | | |
|--|---------|-------------|-------------------|--------------|-------------------|----|----|----|----|----|--------------|----------|
| M13-DEEP-LEARN-SEQ: Deep Learning for Sequential Data | | | | | | | | | | | | |
| Main Content - Copy | | | | | | | | | | | | |
| Lecture content Content: - Deep learning for sequential data; - Training recurrent neural networks using BPTT; - Recurrent architectures: LSTM, GRU; - Sequential attention; - Transformer, Perceiver, Perceiver IO; - The basics of how to work with time series; - Applications; - ... | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding e.g. these topics: - Applications, e.g. an example of doing OCR, machine translation, etc.; - Fine-tuning a language model (BERT, GPT), e.g. to Shakespeare's texts; - Fine-tuning a language model to a classification task, e.g. to IMDB; - LSTMs and time series; - Forecasting: ARMA, LSTM, XGBoost, ...; - Optionally also time series decomposition, etc.; - ... | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |

| | | | | | | | | | | |

| Kokonaisyksikön työmäärä | 11h | | | | | | | | | | | |
| M22-ADVERSARIAL-SEARCH: Search Methods in Adversarial Contexts | | | | | | | | | | | | |
| Main Content | | | | | | | | | | | | |
| <p>Lecture content</p> <p>Content: - The basic idea and zero-sum games; - Minimax; - Alpha-beta search; - Memoization; - MCS, MCTS; - Deep learning in adversarial search: AlphaGo, AlphaZero; - ...</p> | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| <p>Colab Notebooks</p> <p>A set of colab notebooks, regarding especially these topics: - Minimax and alpha-beta search on tic-tac-toe; - Memoized minimax on tic-tac-toe; - MCTS on tic-tac-toe; - Optionally other model examples; - ...</p> | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |

| | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|----------------------|----|----|----|----|----|--------------|----------|
| Lecture content Content: - Complexity classes: NP, NP-hard, ... - Metaheuristics: the basic idea; - Genetic algorithms (GA); - Genetic programming (GP); - High-level: other approaches, e.g. swarms etc. - Advantages/problems, especially w.r.t. sample efficiency. | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - GA cars in HTML/javascript; - Optimization using GA: an example; - GP for symbolic regression; - GA for evolving a neural network for the "Flappy" game; - ... | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |
| Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams. | 330 min | Tutkimus | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | Ei | | |

| | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|-------------------|----|----|----------|----|----|--------------|----------|
| <p>Quiz activities</p> <p>Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.</p> | 30 min | Arviointi | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Opettaja | Ei | Ei | | |
| <p>Kokonaisyksikön työmäärä</p> | 11h | | | | | | | | | | | |
| <p>M24-STATE-SPACE: State-space Approaches in Control</p> | | | | | | | | | | | | |
| <p>Main Content</p> | | | | | | | | | | | | |
| <p>Lecture content</p> <p>Content: - State-space models; - State-space models and control;</p> | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| <p>Colab Notebooks</p> <p>A set of colab notebooks, regarding especially these topics: - Code and applicational examples of state-space-based approaches; - ...</p> | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |

| M25-BAYES-NET: Bayesian Networks | | | | | | | | | | |
| Main Content | | | | | | | | | | |
| Lecture content Content: - Bayesian networks; - The model: graphs and CPTs; - Inference methods etc.; - Influence diagrams; - The Kalman filter as a specific type of a Bayesian network; | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei |

| | | | | | | | | | | | | | | |
|--|---------|-------------|-------------------|--------------|----------------------|----|----|----------|----|----|--------------|----------|--|--|
| Lecture content Content: - Introduction to ML-Agents - Key components: Agents, Brains, Academy - Training custom AI for simple games | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | | | |
| Colab Notebooks A set of examples regarding ML agents in the context of games. | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja | | |

| Kokonaisyksikön työmäärä | 11h | | | | | | | | | | | | | |
| M27-FAIRNESS: Fairness in Machine Learning | | | | | | | | | | | | | | |
| Main Content | | | | | | | | | | | | | | |

| | | | | | | | | | | | | |
|---|---------|-------------|-------------------|--------------|----------------------|----|----|----------|----|----|--------------|----------|
| Lecture content Content: - Motivation: why fairness in machine learning is a key topic; - Fairness frameworks for machine learning, e.g.: - demographic parity; - equal odds; - equal opportunity; - ... - Tutorials with group discussions; - ... | 120 min | Hankinta | Hybrid | Synnkroninen | Opettaja läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Colab Notebooks A set of colab notebooks, regarding especially these topics: - Demonstration + applicational examples of fairness frameworks for ML; - ... | 180 min | Harjoittelu | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | 0 | Yhteenvetona | Opettaja |
| Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams. | 210 min | Tutkimus | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Ei | Ei | Ei | | |
| Quiz activities Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material. | 30 min | Arviointi | Verkkotyöskentely | Asynkroninen | Opettaja ei läsnä | Ei | Ei | Opettaja | Ei | Ei | | |
