

<b>M1-INTRO:</b> <b>Introduction to Artificial Intelligence and Machine Learning</b>										
<b>Welcome meeting (onsite/online)</b>										
<b>Welcome meeting: basic course info</b> The aim of the activity is to present the basic information about the course, its content, activities, requirements and methods of assessment to all participants. The activity is going to be done on-site for participants who can make it to Žilina and online for the rest.	30 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne
<b>Welcome meeting: discussion</b> The aim of the activity is for everybody involved to get acquainted, to discuss what their background is, to communicate their expectations, etc. The activity is going to be done on-site for participants who can make it to Žilina and online for the rest.	30 min	Diskusija	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

Ukupna opterećenja cjeline	1h												
Main Content													
<b>Lecture content</b> Content: - Motivational introduction; - What is AI: the 4 approaches; - Explicit / implicit approaches; - Machine learning and its types; - Supervised learning (demonstration using k-nearest neighbours); - Unsupervised learning (demonstration using k-means); - Reinforcement learning; - Local and global generalization; - Search methods (demonstration using naïve search for Sudoku);	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne			
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: - KNN, an illustration; - KNN on the Iris dataset; - Preprocessing and scikit-learn pipelines; - KNN for regression;	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik	
<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne			

<b>Lecture content</b> Content: - Data analysis: the steps; - Preprocessing, missing data imputation; - Exploratory data analysis (EDA); - Visualization; - Dimensionality reduction (PCA, t-SNE, UMAP);	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: - EDA, data examination; - EDA, visualization; - Dimensionality reduction; - More advanced preprocessing, e.g. custom transformer to extract titles from string using regex; - More advanced imputation; - ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Lecture content</b> Content: – KNN: a distance-based, lazy method; – Naïve Bayes classifier: considers each feature independently; – Decision Trees: considers combinations of features; – Ensembles: what they are, how they work, why they work;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: – Decision tree based classification and regression; – The impact of pruning hyperparameters: an illustration; – Ensembles: – Homogeneous; – Heterogeneous; – A naïve Bayes model for text classification; – ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne
<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne
<b>Ukupna opterećenja cjeline</b>	11h									
<b>M4-CLUST: Cluster Analysis</b>										
<b>Main Content</b>										
<b>Lecture content</b> Content: – Clustering methods; – k-means; – hierarchical; – DBSCAN; – Distance measures; – Application examples;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

<b>M5-CONVEX-OPTI: Convex Optimization</b>												
<b>Main Content</b>												
Lecture content Content: – Convex optimization tasks, methods, principles;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
Colab Notebooks A set of colab notebooks, regarding especially these topics: – Illustrational notebooks regarding optimization tasks and methods; – Applicational examples; – ...	120 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik
Independent study time + review The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	390 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne		

<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne
<b>Ukupna opterećenja cjeline</b>	11h									
<b>M6-OPTI-LEARN: Optimization-based Machine Learning</b>										
<b>Main Content</b>										
<b>Lecture content</b> Content: - A recap on the "acting rationally" AI paradigm; - What optimization is; - How it is used in machine learning, minimizing a loss function, etc.; - Simple optimization-based approaches: - Linear regression; - Polynomial regression; - Gradient descent; - Logistic regression; - Batch, incremental and mini-batch learning;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

<b>M7-EVAL: Evaluating Model Performance</b>										
<b>Main Content</b>										
<p>Lecture content Content: – Evaluating model performance; – Verifying the ability to generalize: – Split validation; – Stratification; – The validation set and model selection; – Cross-validation; – Performance measures: – For classification: – Why accuracy is not enough; – ROC analysis etc.; – Micro/macro averaging for multi-class problems; – For regression; – Bias vs. variance trade-off; – Regularization methods;</p>	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

<p><b>Colab Notebooks</b></p> <p>A set of colab notebooks, regarding especially these topics:</p> <ul style="list-style-type: none"> <li>- Examples on model evaluation;</li> <li>- Performance measures for classification;</li> <li>- Examples with class imbalance - accuracy is not enough;</li> <li>- Performance measures for regression;</li> <li>- Diagnosing underfitting and overfitting;</li> <li>- Regularization methods in classical (shallow) machine learning</li> </ul>	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik
<p><b>Independent study time + review</b></p> <p>The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.</p>	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne		
<p><b>Quiz activities</b></p> <p>Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.</p>	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne		

Ukupna opterećenja cjeline	11h												
M8-INTERPRET-TABULAR: Interpretability of Models on Tabular Data													
Main Content - Copy													
Lecture content Content: - Why interpretability can be crucial; - Prediction vs. inference; - Model-agnostic interpretability methods - LIME, - Partial dependence plots; - Feature importance (permutation, etc.);	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne			
Colab Notebooks A set of colab notebooks, regarding especially these topics: - Interpretability for tabular ML: sample notebooks; - ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik	

<p><b>Lecture content</b></p> <p>Content: – Artificial neural networks can be trained using gradient descent; – Artificial neuron, activation functions; – What the artificial neuron does + linear separability, ... – Multiple layers of neurons and universal approximation; – Feed-forward/recurrent, layered/non-layered architectures; – Neural networks for classification and regression; – How to compute the gradients: autodiff; – Motivation: autodiff vs. symbolic and numeric differentiation; – Autodiff: the principle + graphical illustrations; – Backprop through common operations (graphically); – Defining new operations, incl. the caching of intermediate results; – Autodiff: a numeric example;</p>	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne
--	---------	-----------	----------	----------	--------------------	----	----	----	----	----

<b>M10-DEEP-LEARN: Deep Learning</b>										
<b>Main Content</b>										
<p>Lecture content  Content: – Motivational examples; – Why use deep neural nets: the intuition; – Why depth helps; – Neural nets can learn to preprocess; – Visualization of a deep embedding; – The challenges to deep learning in the past + modern deep learning; – Deep learning architectures; – Convolution; – Evolution of different components: ResNet, etc. – Regularization in deep learning: early stopping, dropout, BatchNorm, ... – Popular tricks: – Augmentation; – Transfer learning; – Label smoothing; – ...</p>	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

<b>M11-DEEP-LEARN-ADVANCED:</b> <b>Advanced Approaches in Deep Learning</b>												
<b>Main Content</b>												
<b>Lecture content</b> Content: - Unsupervised deep learning; - Autoencoders; - GAN, StyleGAN; - ... - Object detection; - Segmentation; - ...	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne	Ne	
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: - A StyleGAN notebook; - YOLO; - Segmentation; - Annotation for detection and segmentation; - ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Lecture content</b> Content: – Methods, principles, approaches for interpretability in deep neural networks, e.g.: – Saliency; – Pre-images; – Adversarial examples; – Neural artistic style; – ...	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: – Adversarial examples; – Visual interpretation; – Generating pre-images; – Neural Art; – ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik
<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne		

Ukupna opterećenja cjeline	11h									
M13-DEEP-LEARN-SEQ: Deep Learning for Sequential Data										
Main Content - Copy										
Lecture content Content: – Deep learning for sequential data; – Training recurrent neural networks using BPTT; – Recurrent architectures: LSTM, GRU; – Sequential attention; – Transformer, Perceiver, Perceiver IO; – The basics of how to work with time series; – Applications; – ...	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

<p><b>Colab Notebooks</b> A set of colab notebooks, regarding e.g. these topics: - Applications, e.g. an example of doing OCR, machine translation, etc.; - Fine-tuning a language model (BERT, GPT), e.g. to Shakespeare's texts; - Fine-tuning a language model to a classification task, e.g. to IMDB; - LSTMs and time series; - Forecasting: ARMA, LSTM, XGBoost, ...; - Optionally also time series decomposition, etc.; - ...</p>	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik
<p><b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.</p>	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne		

<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne		
<b>Ukupna opterećenja cjeline</b>	11h											
<b>M14-ENSEMBLE: Ensemble Methods</b>												
<b>Main Content</b>												
<b>Lecture content</b> Content: – Ensembles; – Homogeneous, heterogeneous; – Independent models (e.g. bagging), dependent models (e.g. boosting); – Bagging, random forests; – Boosting: – AdaBoost; – Gradient boosting; – Stacking;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: – Ensembles, homogeneous: – XGBoost, LightGBM; – Ensembles, heterogeneous: – Voting; – Stacking; – ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne
<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne
<b>Ukupna opterećenja cjeline</b>	11h									
<b>M15-DIMRED: Dimensionality Reduction</b>										
<b>Main Content</b>										
<b>Lecture content</b> Content: - Dimensionality reduction; - The linear approach: - PCA; - Pros and cons; - Graph embedding methods; - tSNE, UMAP; - Principles and differences;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

Main Content												
<b>Lecture content</b> Content: - Embeddings; - Motivational example: face recognition and clustering; - Why a standard deep classifier would fail; - Distance measures / preprocessing / learning; - Embeddings in general: - Classifiers; - Word embeddings; - Dimensionality reduction; - Reinforcement learning; - ... - Face embeddings and clustering; - ...	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: - Word embeddings; - Embedding images using a CNN classifier; - Face clustering: a practical example; - ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Lecture content</b> Content: – Machine learning and hyperparameters; – Hyperparameter optimization; – Gaussian processes; – MLE, MAPE vs. the full Bayesian approach; – Bayesian optimization;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne			
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: – Gaussian processes; – Gaussian process regression; – Bayes optimization: an illustrational notebook; – Bayesian hyperparameter optimization; – Grid search; – ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik	
<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne			

<b>Lecture content</b> Content: – Reinforcement learning; – Motivational examples; – MDPs: the elements of an MDP, the Markov condition; – Policies; – Long-term rewards; – The goal of RL; – The types of RL: – Value-based; – Policy-based; – Actor-critic; – Value functions; – Recursiveness, Bellman equations; – Exploration vs. exploitation; – Greedy, $\epsilon$ -greedy, softmax; – Tabular methods: – Dynamic programming; – Monte Carlo learning; – Temporal difference learning; – SARSA and Q-learning: the difference between on-policy and off-policy methods; – Experience replay;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: – The OpenAI Gym interface; – Illustration of the basic tabular methods using gridworld examples; – Experience replay; – ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Lecture content</b> Content: - Value function representation; - Tabular; - Approximation using shallow models; - Deep learning; - DQN; - Policy gradient methods; - With shallow models; - With deep models; - Actor-critic: - REINFORCE, A3C, A2C; - PPO; - DDPG; SAC;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: - DQN applied to the Lunar Lander; - SAC applied to the inverted pendulum; - SAC applied to AntBullet; - ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik
<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne		

<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne		
<b>Ukupna opterećenja cjeline</b>	11h											
<b>M20-SVM: Support Vector Machines</b>												
<b>Main Content</b>												
<b>Lecture content</b> Content: - Support vector machines; - The maximum margin classifier; - The kernel trick; - ...	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: - Classification/regression examples using SVMs; - Preprocessing, kernels, ... - ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Lecture content</b> Content: – State space versus the search tree; – Problem formulation; – Uninformed versus informed search; – Comparison criteria (completeness, optimality, time and space complexity); – Search problem examples; – Optionally the basics of constraint programming;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: – Examples using model problems; – 8-puzzle, maze, ... – Implementation and comparison of different search methods; – BFS, UCS, DFS, DLS, IDS, BS, backtracking, FCh, ... – ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Lecture content</b> Content: - The basic idea and zero-sum games; - Minimax; - Alpha-beta search; - Memoization; - MCS, MCTS; - Deep learning in adversarial search: AlphaGo, AlphaZero; - ...	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne			
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: - Minimax and alpha-beta search on tic-tac-toe; - Memoized minimax on tic-tac-toe; - MCTS on tic-tac-toe; - Optionally other model examples; - ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik	
<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne			

<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne
<b>Ukupna opterećenja cjeline</b>	11h									
<b>M23- METAHEURISTICS: Metaheuristic Optimization</b>										
<b>Main Content</b>										
<b>Lecture content</b> Content: - Complexity classes: NP, NP-hard, ... - Metaheuristics: the basic idea; - Genetic algorithms (GA); - Genetic programming (GP); - High-level: other approaches, e.g. swarms etc. - Advantages/problems, especially w.r.t. sample efficiency.	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

<b>M24-STATE-SPACE: State-space Approaches in Control</b>													
<b>Main Content</b>													
<b>Lecture content</b> Content: – State-space models; – State-space models and control;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne			
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: – Code and applicational examples of state-space-based approaches; – ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik	
<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne			

<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne		
<b>Ukupna opterećenja cjeline</b>	11h											
<b>M25-BAYES-NET: Bayesian Networks</b>												
<b>Main Content</b>												
<b>Lecture content</b> Content: - Bayesian networks; - The model: graphs and CPTs; - Inference methods etc.; - Influence diagrams; - The Kalman filter as a specific type of a Bayesian network;	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne		
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: - Construction of Bayesian networks using existing software tools; - Filtration using the Kalman filter; - ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik

<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	330 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne
<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne
<b>Ukupna opterećenja cjeline</b>	11h									
<b>M26-GAMING: AI and Gaming</b>										
<b>Main Content</b>										
<b>Lecture content</b> Content: - Introduction to ML-Agents - Key components: Agents, Brains, Academy - Training custom AI for simple games	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne

<b>Lecture content</b> Content: – Motivation: why fairness in machine learning is a key topic; – Fairness frameworks for machine learning, e.g.: – demographic parity; – equal odds; – equal opportunity; – ... – Tutorials with group discussions; – ...	120 min	Usvajanje	Hibridno	Sinkrono	Nastavnik prisutan	Ne	Ne	Ne	Ne	Ne			
<b>Colab Notebooks</b> A set of colab notebooks, regarding especially these topics: – Demonstration + applicational examples of fairness frameworks for ML; – ...	180 min	Vježbanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	0	Sumativno	Nastavnik	
<b>Independent study time + review</b> The estimated additional time required for studying the material independently, using the lecture videos/slides and also referencing other literature and material, as necessary. Facilitates correct understanding of the material. This activity also includes the time required for review before exams.	210 min	Istraživanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Ne	Ne	Ne			
<b>Quiz activities</b> Quiz activities meant to provide quick, unassessed feedback to students regarding their grasp of the material.	30 min	Vrednovanje	Online	Asinkrono	Nastavnik nije prisutan	Ne	Ne	Nastavnik	Ne	Ne
